

## ATTENTION PATIENTS

You have been identified as a patient with **known or possible venous reflux disease**.

As part of **the care** for your disease you need to start **wearing your thigh high compression stockings immediately**.

You may use powder in the stocking and then roll the stockings on and off to make it easier to wear.

It would probably be easier to buy them from Amazon or any medical supply store.

You are able to get these Thigh High Compression Stockings with 20-30 mm Hg graded pressure, from Amazon for \$15.00-\$25.00. The doctor or health care provider will help in sizing.

These **stockings need to be worn during the day and removed at night**.

**Do not wear** them on the **day of and day before** any **scheduled procedures** at our office.

If you are **not able to wear** them, please get **ACE wrap bandages**, you may need up to three of them per leg to wrap from ankle to mid-thigh.

As always if you have questions, please call us at 937 979 1038.
